

FOSS4G-CEE

Prága, 2012 május

Márta Gergely
Sándor Csaba

Reklám helye

- 2009 óta
- Intergraph szoftverek felől jöttünk
- FOSS4G felé megyünk
- Békés egymás mellett élés több helyen:
 - Geoshop.hu
 - Terkep.torokbalint.hu
 - Terinfo.ujbuda.hu
 - Energytradingdata.com

FLOSS4G Kompetenciáink

- OpenLayers
- LeafletJS
- GeoExt
- Mapserver
- GeoServer
- Mapproxy
- PostgreSQL+PostGIS
- Gdal/Ogr
- Qgis + némi python modulfejlesztés indulóban

Az én FOSS4G történelmem

- Barcelona, 2010 FOSS4G
- Prága, 2012 FOSS4G CEE
- ***Nottingham 2013 FOSS4G?***

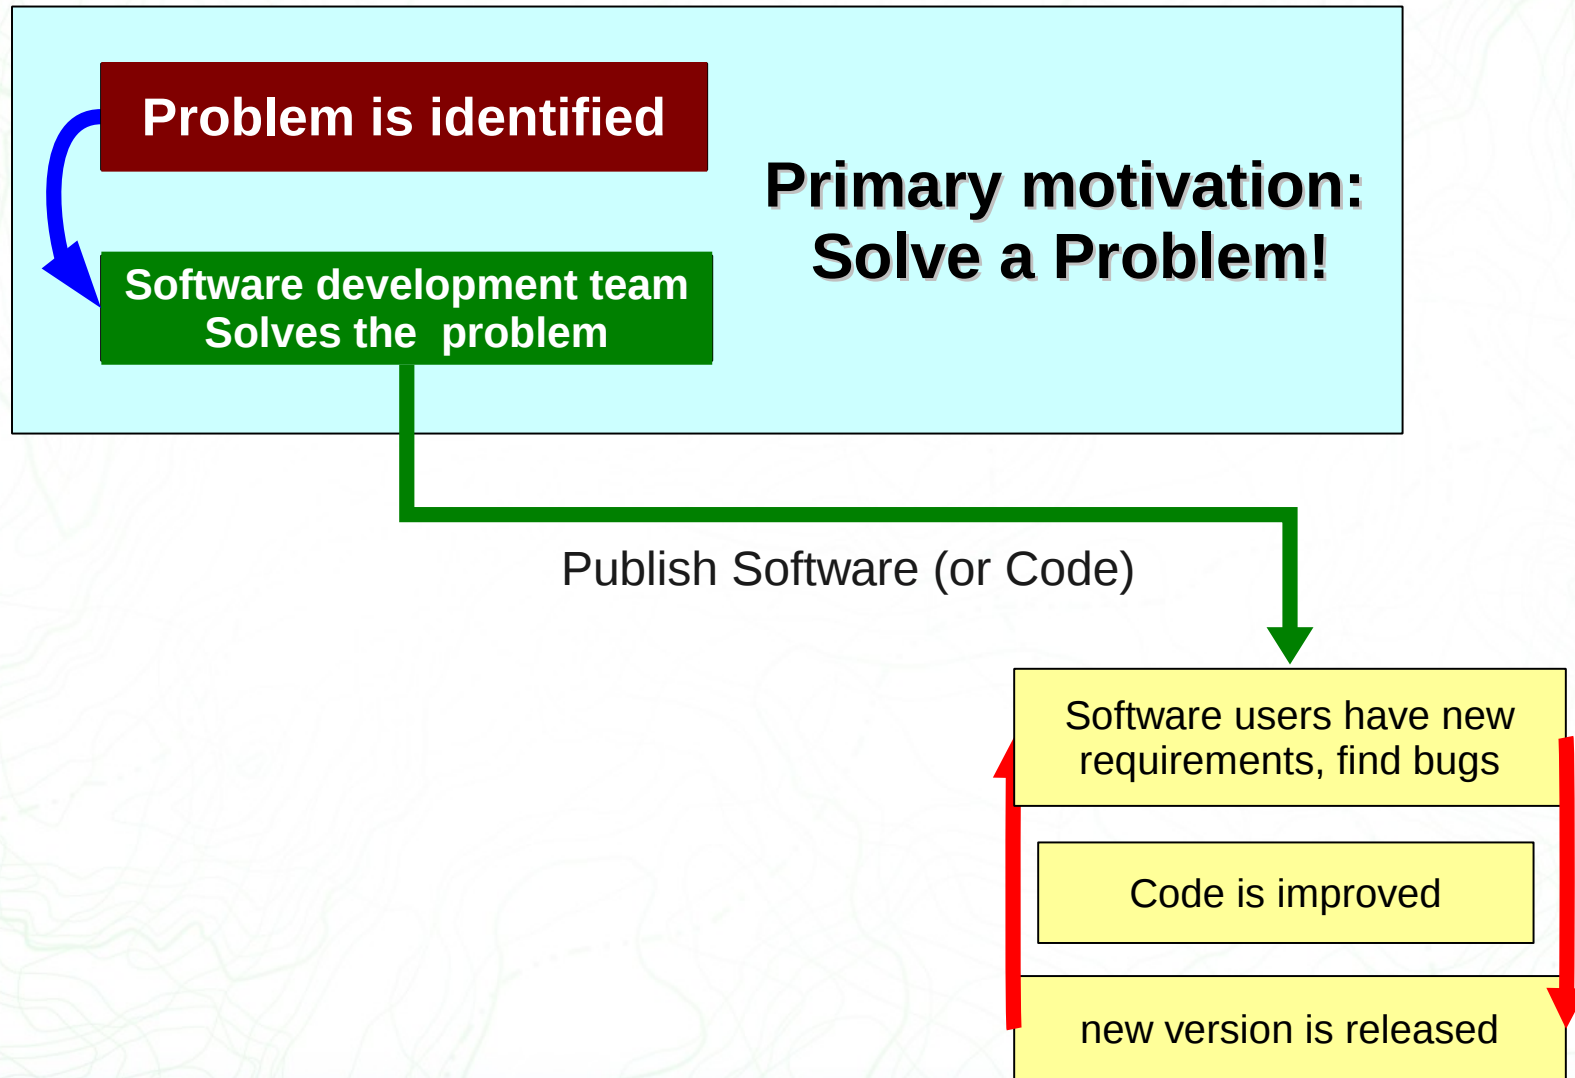

Prezentációk, beszélgetések, újdonságok, tanulás, inspiráció, lendület

- Evangelisták házhoz jönnek:
 - Arnulf Christl (akkor még OSGEO)
 - Markus Neteler (mindig is Grass)
- Program:
<http://foss4g-cee.org/program/overview/>
- Szervezés, hmmm, baráti :)
- A lényeg az is, hogy jól érezzük magunkat a munkában is.

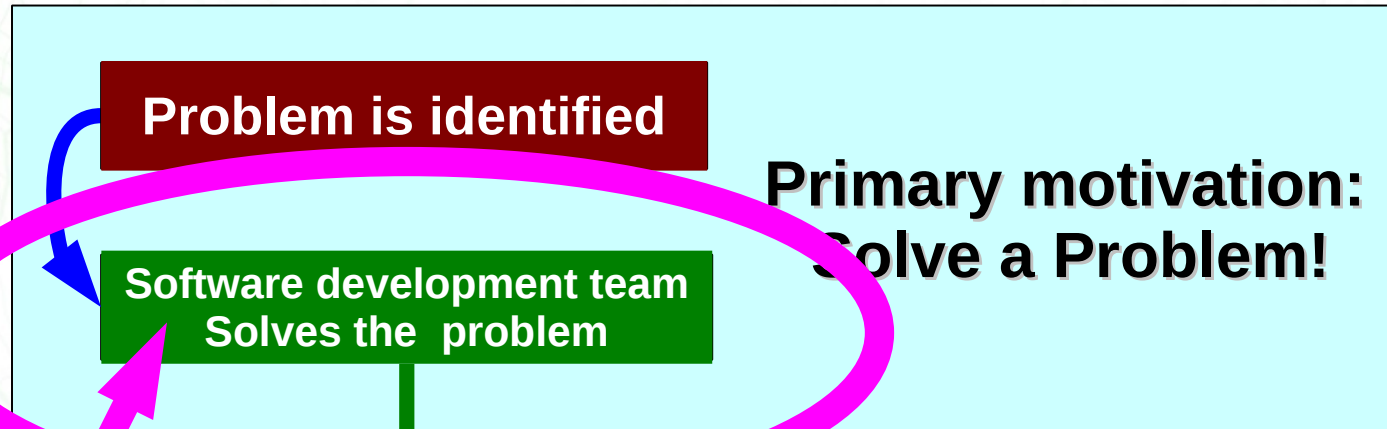

Keynote villanás

- „You have the right to copy.”
- Credit goes to: Arnulf Christl
- <http://arnulf.us/Seven:Copyrights>

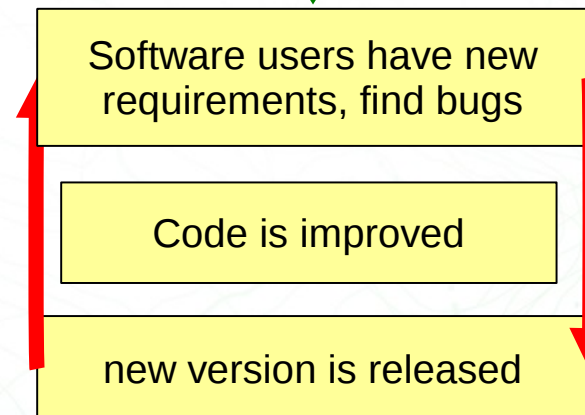

Software Development

Software Development

Publish Software (or Code)

This is where the action is happening

Proprietary production

Ask questions:

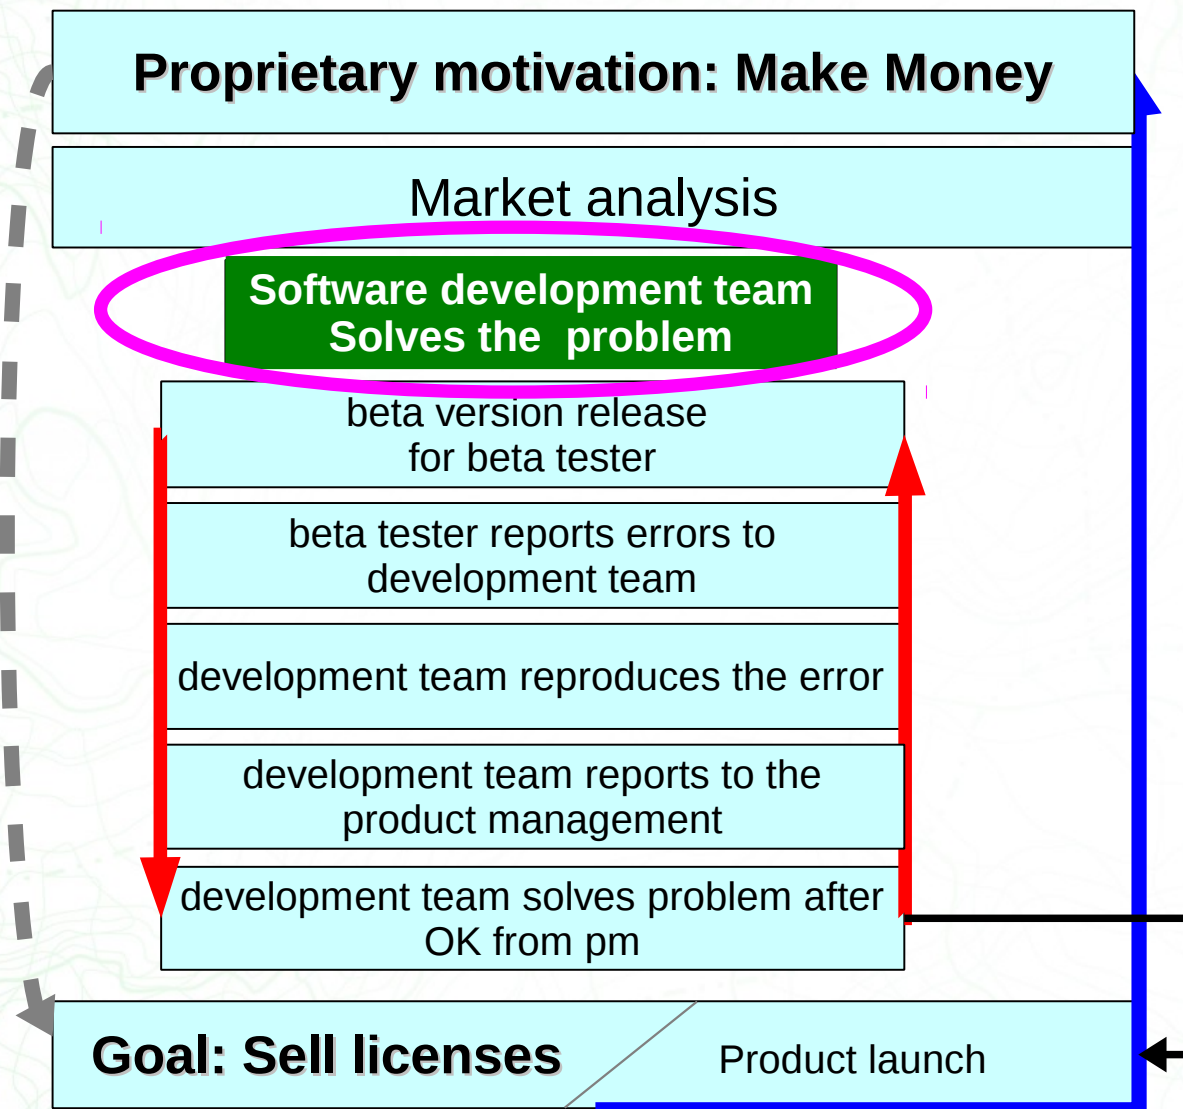

When is the software released?

When is new functionality implemented?

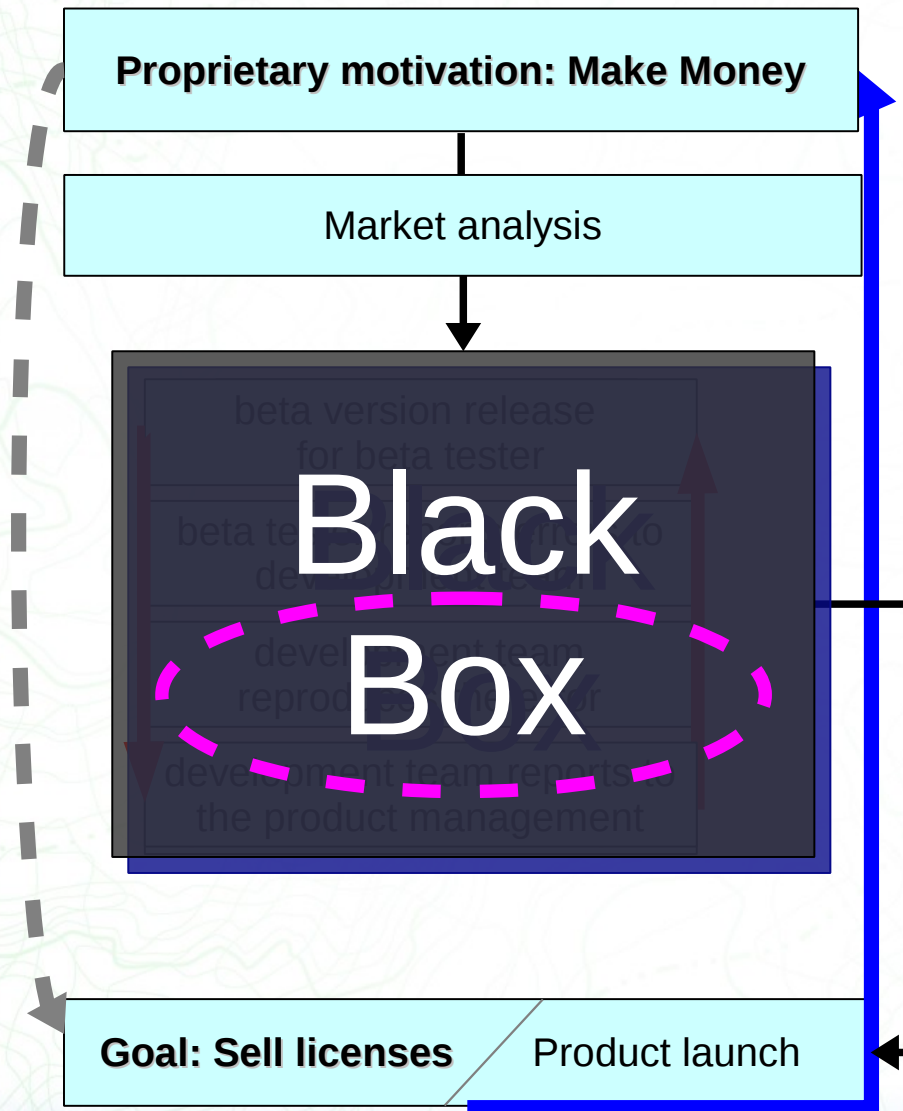

Who cares if something breaks?

How many people develop software?

What do the others do?

Proprietary Business Model

Primary Motivation:

- Make money

Primary Task:

- Marketing of differentiation

Associated Business Model:

- Restriction of distribution channels

Open Source Paradigm

Primary motivation:

- Solve Problem

Then:

- Publish the Source Code!
- Let everybody use it
- Help them to copy it!

Copying is not Theft

There is a big difference between material theft and digital copying.

We have difficulties understanding this because we are material.

But our Mind is not entirely material, therefore we can understand.

Open Source Business

Primary motivation: Solve Problem

- Publish results

Consulting

Maintain specific distribution

Support

Training

Implementation

Interaction with Users

- Improve Software

bug fixing

Release often (iterate)

Maintenance

Service Level Agreement

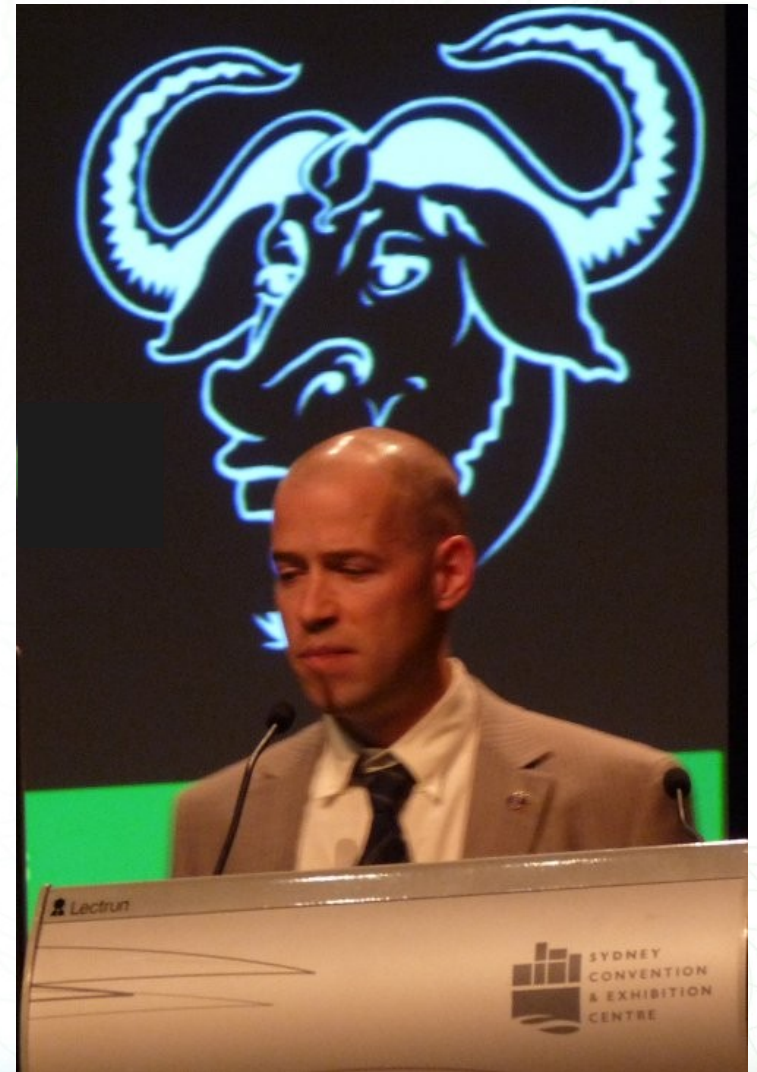

No Monopolies! Highly Competitive!

Free Software is a legal licensing model (a vaccine) protecting your interests.

The opposite is **proprietary software** protecting only the vendor's interests.

Nota bene:

"commercial software" is a frequently used misnomer.

INSPIRE+FOSS4G

- Hogyan lesz ebből itthon lehetőség?
- Geoportálok korábban hogyan teljesítünk?
- Miért nincs GIS piac?
- Cseh kataszter ingyenes wms-en érkezik!

Szabad Szoftver Kompetencia Központ

- Ki tud róla?
- KIM-ben alakult.
- Ők tudnak-e rólunk?

Köszönöm a figyelmet!

- Egy videó a végére
